## **DETAILED ACTION**

### ***Introduction***

1. The preliminary amendment received on 29 December 2000 canceled claims 34-46 and 55-59. However, the application as filed, only included claims 1-54. Accordingly, claims 34-46 of the originally filed claims have been canceled. Currently, claims 1-33 and 47-54 are pending.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-33, drawn to a product, classified in class 253, subclass 205.
  - II. Claims 47-52, drawn to a method of storing a binary logic value, classified in class 365, subclass 250.01.
  - III. Claims 53-54, drawn to a method of making, classified in class 438, subclass 313.
3. The inventions are distinct, each from the other because of the following reasons: Inventions II and III are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).

Art Unit: 2822

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
